

New age Everest Smart Steel Buildings technology introduced in Chandigarh Capital Region

Now Build Fast, Build Smart with No-brick, No-sand

Panchkula, March 5, 2016: Everest Industries Ltd., one of India's fastest growing complete building solutions company, today introduced its new age rapid construction technology for residential and commercial buildings - **Everest Smart Steel Buildings, as the best alternative to conventional methods of construction in Chandigarh Capital Region.** Everest Smart Steel Buildings comes with the promise of delivering earthquake resistant and all weather proof buildings at three times faster pace than conventional brick & mortar construction.

Everest Smart Steel Buildings comes as the best possible alternative to conventional construction and uses no brick no sand and minimal water while is 3 times faster in construction. Additionally, as this is a light weight construction technology, it is ideally suited for hilly as well as extreme weather prone geographies Chandigarh Capital Region. Besides offering great design flexibility, these buildings are also resistant to adverse weather conditions, earthquake, moisture, termite and fire, making it ideal for construction of villas, resorts, hotels as well as roof top extensions.

Speaking on the occasion, **Mr Subrata Dutta, Vice President – Everest Smart Steel Buildings, Everest Industries Ltd.,** said, *“Everest recognizes the construction needs of various market sectors and delivers smart, flexible and quick solutions. Steel buildings don't have to be dull boxes meant only for industrial infrastructure. Modern residences and businesses need modern buildings with highly specific and environment friendly features. Everest ensures that all of this is achievable with added benefit of speed of construction and improved health & safety with its 100% customized Everest Smart Steel Buildings. We see a tremendous opportunity in the construction market of the tri-city, wherein people can benefit immensely in terms of fast, strong, safe and eco friendly construction by using modern construction technology like Smart Steel Buildings.”*

With Everest Smart Steel Buildings, construction of a building can be completed at a three times faster rate than conventional methods of construction even in seismic, hilly, coastal and high-wind areas. Ideal for low-rise low-span structures, Everest Smart Steel Buildings are 100% customized, aesthetic, durable and green buildings with inbuilt stability. This innovative state-of-the-art technology is the fastest for manufacturing and erecting a building. Using the core strength of high tensile steel, its Light Gauge Steel Frame system allows multiple applications across residential and commercial sectors. Everest Smart Steel Buildings offer great design flexibility and allows architects & interior designers to choose from large variety of internal and external finishes.

Timely performance, excellent service backup and faster response time are the reasons that leading PSUs like NTPC, ONGC, OPGC, DTDC, NBCC etc as well as renowned corporate like TATA Steel, POSCO Steels, GMR Hydropower, Jindal Steel & Power, ANSAL and many more trust Everest Smart Steel Buildings for their commercial and residential construction needs. This apart many a private villas, second homes and resorts have been constructed by Everest Smart Steel Buildings in record time which includes construction of 60,000 sq ft ANSAL Institute of Management & Technology in Lucknow in just 90 days, registering its name in Limca Book of Records for the fastest construction in India.
