

Points to be kept in mind

Everest E.P.D.M. washer has been specially designed so as to fit easily on the sheet. Some instructions must be kept in mind while fitting it, like:-

- Do not make holes in dry sheets, otherwise they may break
- There should be no gap between the sheets
- Match the edges of the sheets properly
- Always use some support while making holes in the sheet
- Do not tighten the washer too much

Do not keep the nut loose

Correct position

Do not tighten the nut too much

With over 6000 retail centers all over the country, Everest Company provides the complete solution for your building construction, wherever needed.

Everest E.P.D.M. Washer

E.P.D.M. Washer is one of Everest's high quality products. These are the most effective washers to stop leakage in the roof. Where ordinary washers get damaged by severe heat and rain, E.P.D.M. washers, made from a unique technology, can easily withstand the damaging effects of high temperature, moisture, water, harmful rays of the Sun and climate. Even chemical reactions have no effect on this washer, which keeps the roof safe for a long time.

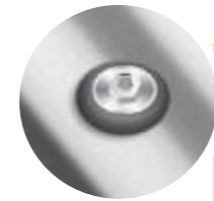

A saving deal

Their sturdiness, long life and zero maintenance gives the customer more savings and more profit.

Chemical resistant

The chemical reactions taking place in the atmosphere do not affect it.

No damage to the sheet

The sheet does not crack while fixing Everest washer and the roof isn't damaged either.

Long life

It has a longer life span compared to any other washer

Cracks do not develop

This washer doesn't develop crack even if it is very hot or cold.

Leakage Free

Its strong bond stops roof from leaking

Endures in all the seasons

This washer has the capacity to bear all the seasons and even harmful sunrays have no effect on it.
